Cat's Claw Craft Hook

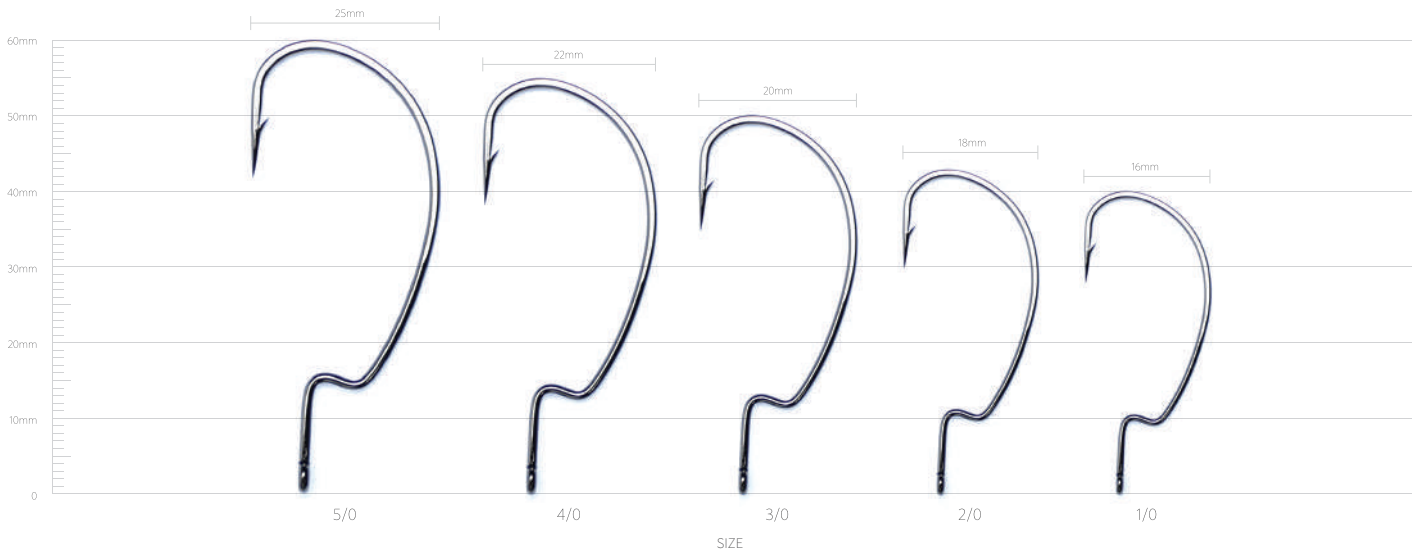

OFFSET HOOK 512

High carbon steel and stable gap design for higher tension deliver more advanced elasticity and hooking performance!

Superb spinning and the corresponding braid sheen. High carbon steel for reliable wire fundamentals and stable gap design for higher tension deliver more advanced elasticity and hooking performance. The combination of soft bait and long throat hook achieve a perfect coordination with worms. Designed to better respond to short and quick bites.

₩2,500					
SIZE	5/0	4/0	3/0	2/0	1/0
QUANTITY	5	6	6	6	7

Made in Korea

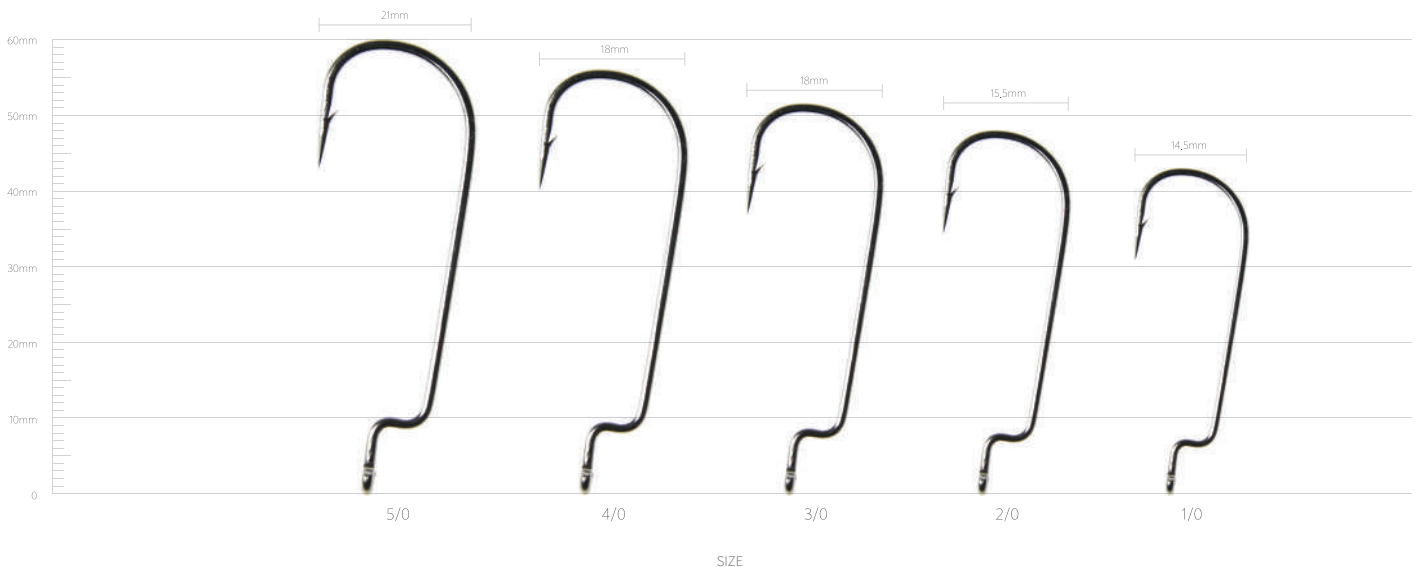

313 OFFSET HOOK

High-balance offset hook with outstanding penetrability

Applicable to various worms and highly versatile. Cat's Claw 313 Offset Hook is applicable for a variety of worms and highly versatile. Its novel form of crank achieved hook-worm integration, boasting of excellent hooking.

₩2,500					
SIZE	5/0	4/0	3/0	2/0	1/0
QUANTITY	5	6	7	7	8

Made in Korea

Cat's Claw Craft

Hook

ROCK FISH 315

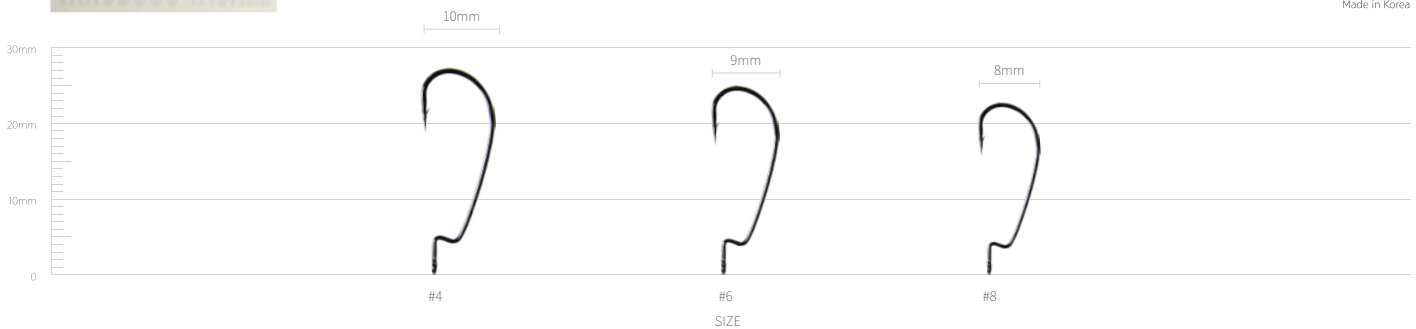

315 hook to target small fish species. Ideal gap and line eye design to catch rockfish short striking

Ideal gap and line eye design to catch the short striking of rockfish to overcome extremely short striking for easy hooking. Designed for fun games with spotty belly greenling, sea bass, and Korea rockfish.

₩2,500

SIZE	#4	#6	#8
QUANTITY	8	8	8

Made in Korea

WACKY WORM 420

Hook point for sharp penetration

Made to deliver excellent hooking even for subtle striking. Unique wide gap type with deep and reliable hooking angle! The soft hooking performance and ideal form of the band that holds the worm effectively upon taking an action fulfill a perfect combination to minimize hook fallout after hooking.

₩2,500

SIZE	1/0	1	2
QUANTITY	BLACK 10pcs	RED 9pcs	

Made in Korea

320 NEKORIG OFFSET HOOK

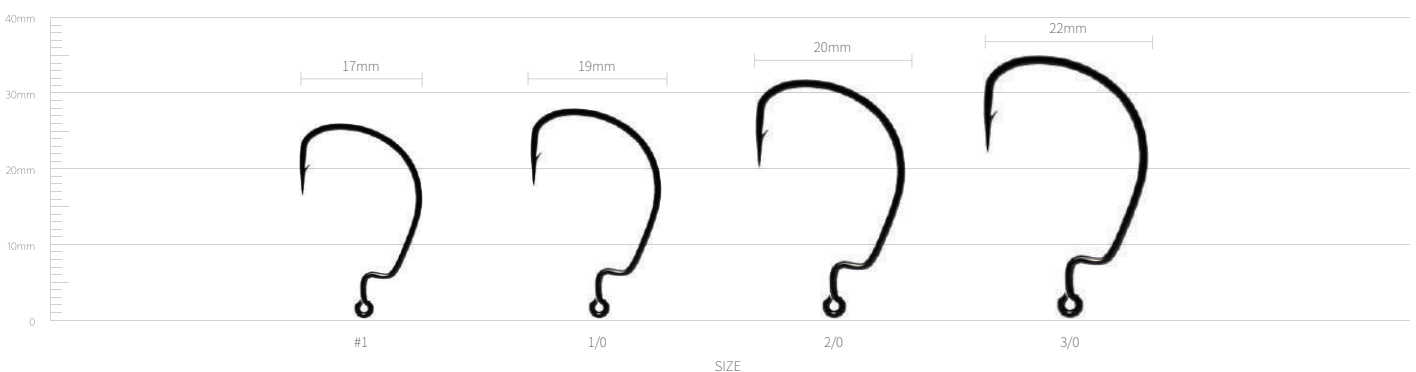

Hook optimized for Neko Rig use

Hookpoint angle for a stronger hooking than hookset. Hook shaking off-minimizing gap size. Optimal hook size against strong shaking off.

₩2,500

SIZE	#1	1/0	2/0	3/0
QUANTITY	7	7	6	6

Made in Korea

Cat's Claw Craft

Hook

513 HEAVY WIRE

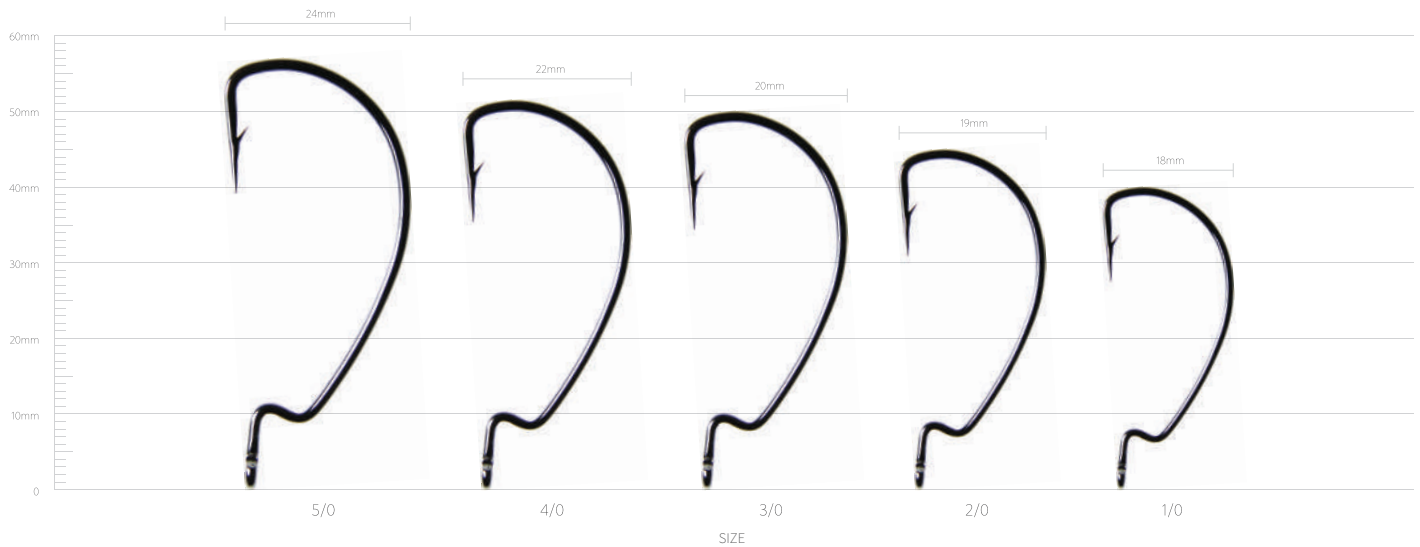

Made of light and strong high carbon steel for unfailing hooking

513 Heavy Wire hook is made of light and strong high carbon steel, has a great wire size leading to unfailing hooking, and works excellently with M (medium)/MH (medium heavy) rods. Loc-centered design for stable warm position. Realized deep thought-out details and forms in terms of wire forge welding, buffing, shank length, point position, setting silhouette, etc.

₩2,500

Cat's Claw Craft

Hook

514 LIGHT WIRE HOOK

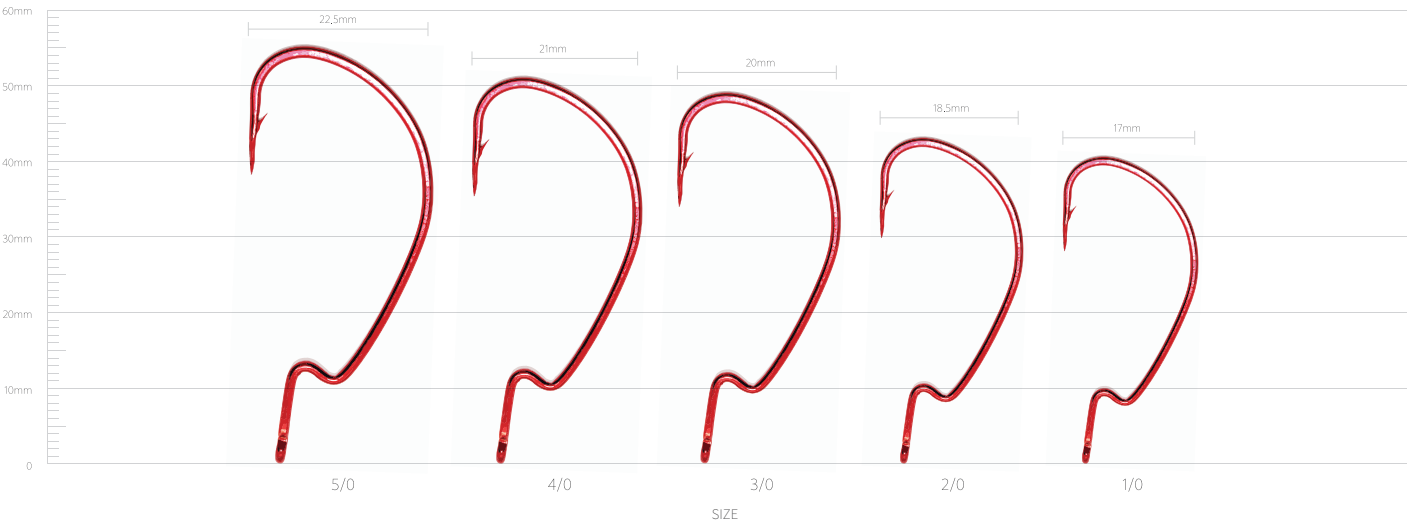

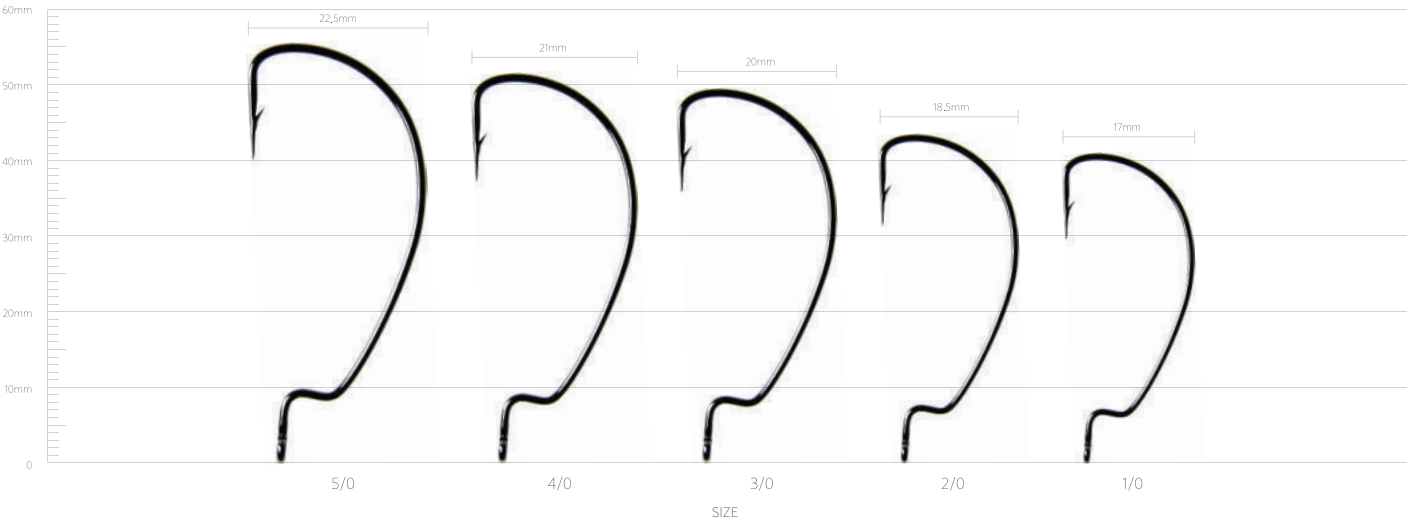

Sharp-pointed worm hook created for further evolution of 513

Wide gap hook based on light-weight high-power carbon steel. Tin light wire directly delivers momentary hooking power. The wire is characterized to make the most of worms' characteristics and designed in the optimal form for extremely natural finish of hooking. Processed in the sharp point method thanks to the ceaseless efforts for point, 514 light hook hardly gets blunt at the end after several times of hooking.

₩2,500

Cat's Claw Craft

Hook

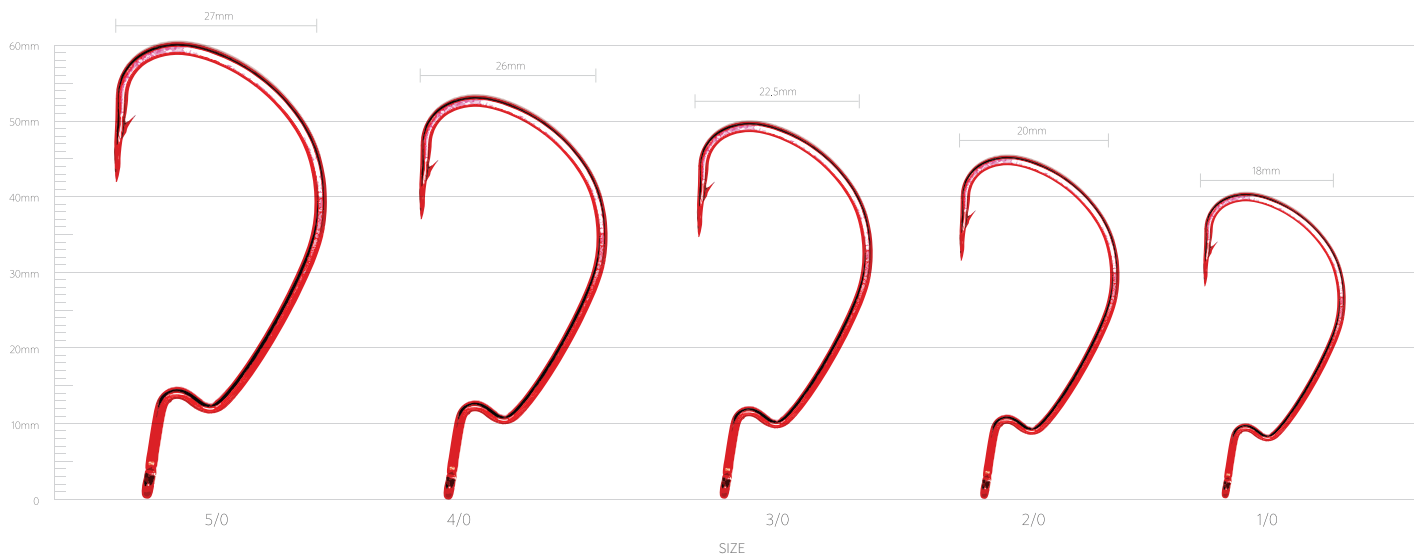

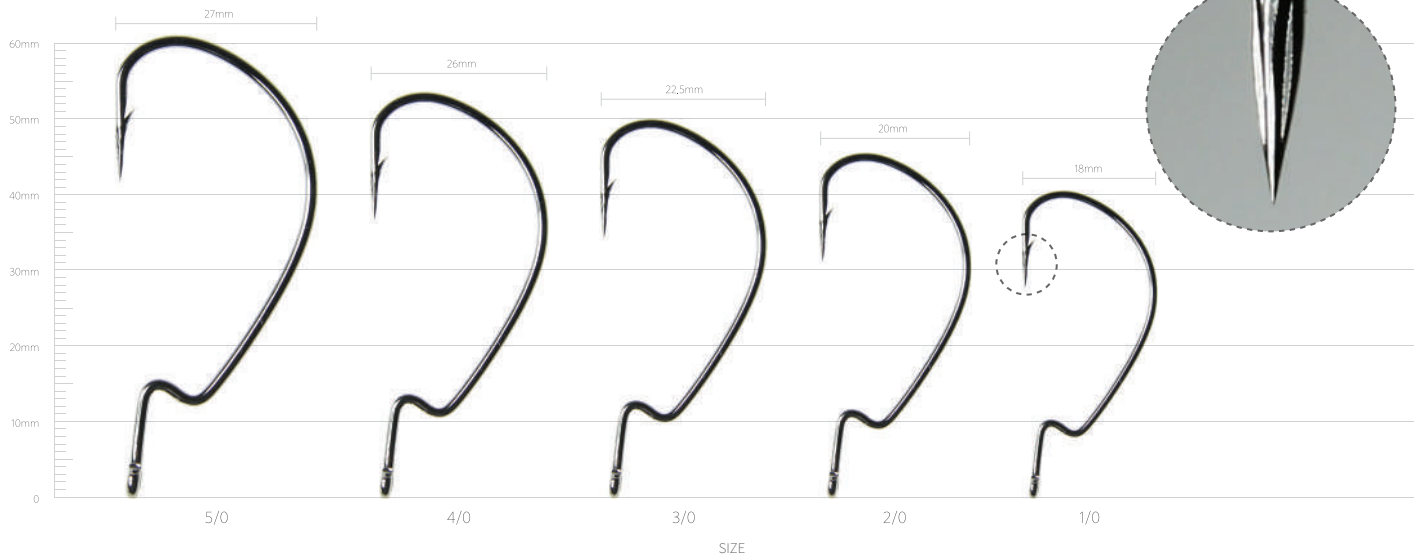

600 QUARREL HEAVY WIRE

Slightly-curved arrow-shaped hook point

600 arrow hook has a slightly-curved arrow-shaped hook point. Wide gap width. Embedded with high-strength stack enduring power fight in a game at a very close distance. The arrow hook point certainly hooks even with a large swim bait or other worms. The angle from the deep band to hook point ensures a good fight with any big mass.

	₩2,500				
SIZE	5/0	4/0	3/0	2/0	1/0
NSB(pcs)	5	5	6	6	7

Hook

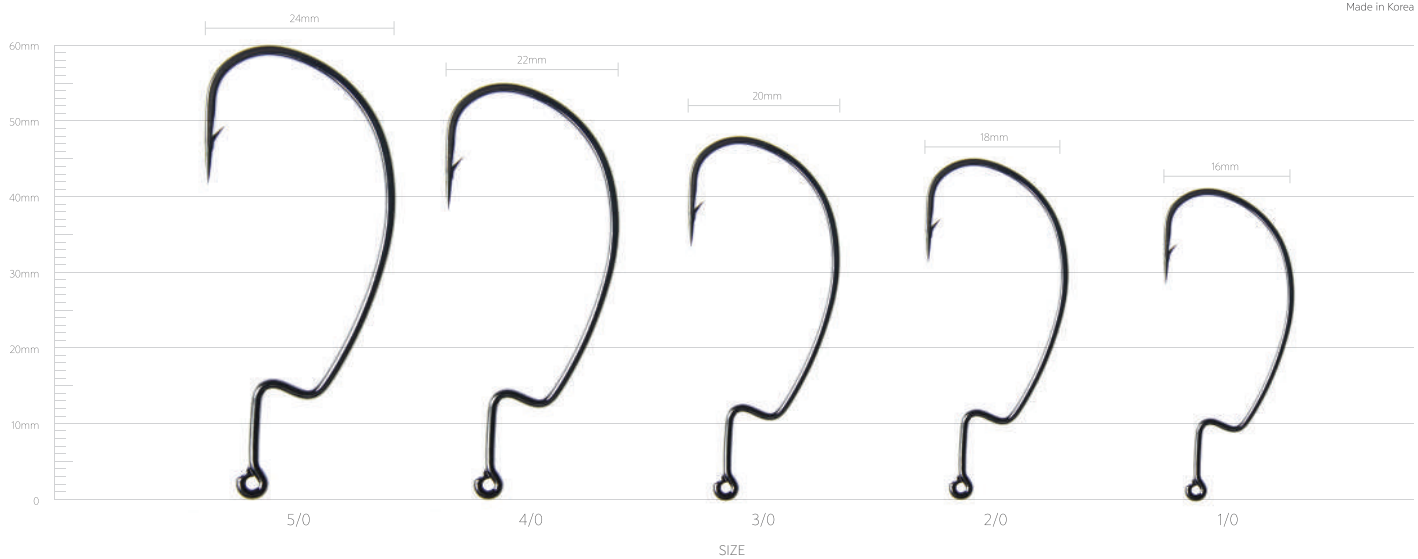

MULTI 590 OFFSET

Multi offset hook for best action performance

Multi 590 Offset hook removes the left-right difference in the line connection part to reduce power loss in hooking. Expanded inner side of the line eye allows direct sinker mount while maintaining integration. Variance in the line eye position supports best action performances in diverse actions and styles without being restricted by worm forms. Length variance from the line eye to neck largely reduces difference. After mounted, it is completely integrated into the style and its form is cleverly favorable for securing space after hit. The hookpoint was further polished and shaped for deeper sticking.

Cat's Claw Craft Hook

302 SINGLE HOOK

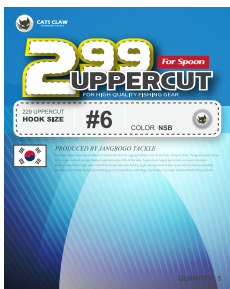

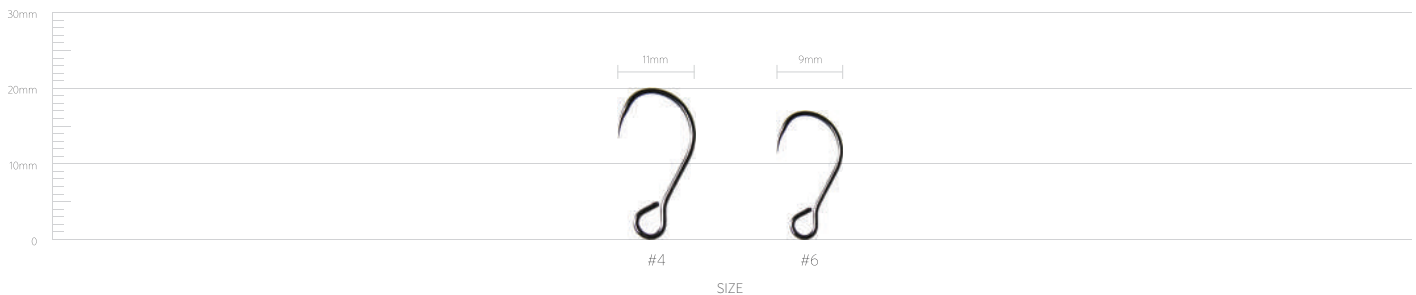

Barbless single hook specialized for trout minnow

The single hook for minnow has vertical line eye in its direction instead of horizontal line eye that is commonly utilized exclusively for spoon. The hookpoint direction is limited by minnow setting. Helps more sophisticated response in any move from minnow fast twitch to the dead slow of a hook-hanging crankbait.

₩2,500

SIZE	#4	#6
QUANTITY	9	9

Made in Korea

299 UPPERCUT

Soft and swift hooking from bottom to top

Hook specialized in trout-fishing spoon exchange

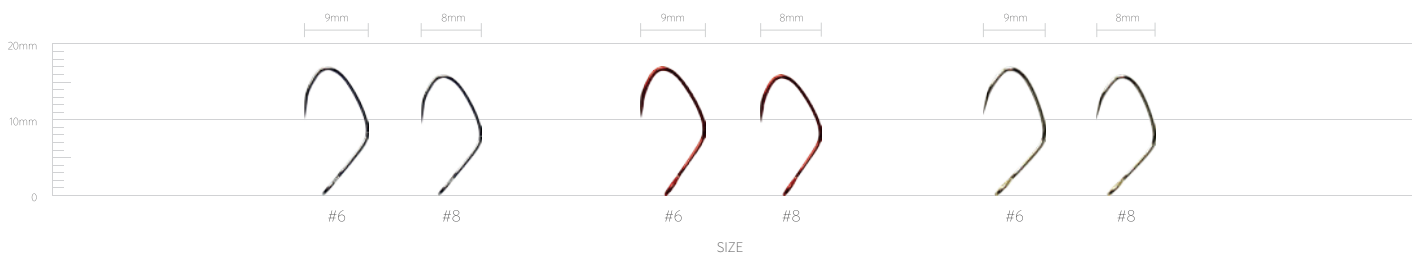

Hook supporting soft and swift bottom-to-top hooking instead of a strong hookset. Tin wire was utilized to sense hooking subtlety in addition to sharp point. Glamorous gold coating. Spoon-replaceable hook coordinating the luring red coating and solid NSB coating.

COLOR: NSB, RED, GOLD

Made in Korea

414 LIGHT OFFSET

Long distance from line eye to neck to lure for bite

Longer distance from the line eye to the neck for easier sticking even with weaker force when using in a bait finesse. Wider choices from the previous-offset big size into smaller sizes for more interesting fishing. Long-term polishing to prevent hook point blunting and special material use elevated the fun of hooking. 414 offset hook is the product of Cat's Claw's accumulated experiences.

₩2,500

DYNAMIC COD HOOK

Made in Korea

The #34-sized sharp hook works strongly upon a target and is nickel-coated against rust by salinity from long-term use. A pair of hooks is designed for deviation to hook in multi-angles. The barb in the optimal angle prevents unhooking as a fish comes up. The Keimura luminous tube emits strong light even in the deep sea and further confuses a target's vision together with the luminous ball, facilitating a successful strike.

COMBI MAX SWIVEL

HIGH QUALITY FISHING GEAR

High-strength, high-revving! Ball bearing swivel + spring set

Weld ring set to install an assist hook and a split ring connecting a jig, etc. to the lure on the powerful BB swivel. Enhanced the existing ball bearing swivel with unreliable strength by thoroughly improving the internal bearing structure consisting of 3 parts. Increased the share of core material, achieving high strength. Used high-quality ST316 ball with high sphericity for the bearing ball. Maintains high spin even under tension. Minimized load upon the line in a close match.

BLACK

Top-quality hook cap protecting the hook internally and externally

The soft but strong cap material holds the hook firmly and is convenient to put on and take out. By putting on the lid, it prevents the hook from external exposure to protect external damage by the hook as well as hook damage by external impacts. Two pairs of hook grooves have different sizes and locations to accept diverse-sized hooks.
